

Glitched Vision

10 September - 4 October 2026

Solo exhibition by Yvonne Feng

Glitched Vision presents new paintings from the final chapter of Yvonne Feng's trilogy *Docile Bodies*, a body of work initiated during the pandemic. Following earlier explorations of barrier and gesture, this final chapter turns to sight, examining the changing nature of looking and image-making in an era increasingly mediated by screens, surveillance technologies, and artificial intelligence.

In these new works, Feng does not depict the body directly. Bodily motifs and diagrams drawn from earlier paintings are screen-printed, compressed, and embedded into the compositions, resurfacing as fragmented images or painterly traces between layers. Through framing, negative shapes derived from natural forms, and overlapping imagery, Feng creates a tension in perception: is the eye drawn towards the seductive familiarity of natural forms, or towards the buried images and residual traces beneath their surfaces? This interplay of concealment and visibility echoes the use of innocuous imagery to obscure what might otherwise come into view.

The paintings' highly saturated palettes recall the artificial intensity of digital screens and the visual aesthetics of thermal imaging. Feng uses a thermal-camera filter to photograph her surroundings, transforming ordinary scenes into source material charged with a sense of alertness, surveillance, and investigation. Familiar environments become strangely forensic, prompting an investigative mode of looking, as though searching for evidence, examining the remnants of a crime scene, or reading stains in an attempt to extract some truth from the past.

This heightened scrutiny also reflects our changing habits of looking within an increasingly AI-mediated image culture. When confronted with an image, what is our first instinct: suspicion, active searching, or cognitive surrender?

Throughout the exhibition, bodily motifs are compressed into pixelated images and fragments of data, reflecting a period since the pandemic in which bodies have been increasingly recorded, measured, and translated into information, feeding the development of technologies built upon the accumulation of biodata. Within the gallery, viewers encounter their own reflections on metallic surfaces while simultaneously coming under the gaze of recurring eye-like forms in the paintings. Taking the metaphorical form of an eye, the eye of a storm, or the lens of a device, this gaze evokes the authority and omnipresence

of the machine. The works invite viewers to return that gaze and consider how readily the body becomes alienated by, or accustomed to, being seen through screens and machines.

Rather than offering images that can be read with clarity and efficiency, *Glitched Vision* presents interruptions in vision and memory. Bodies persist as shadows, fragments, residual gestures, and glitches that resist being easily sorted, classified, or defined. In an era increasingly shaped by machine vision, the exhibition asks what is at stake in the act of looking, and how looking itself might become a means of reclaiming agency.

About the artist

Yvonne Feng (b. Guangdong) lives and works in Hong Kong and London. She completed her MA at the Royal College of Art in 2014 and her practice-led PhD, *Tracing the Unspeakable: Painting as Embodied Seeing*, at the Slade School of Fine Art, UCL, in 2020. She is an Associate Lecturer at Camberwell College of Arts, UAL, and formerly Senior Lecturer in Fine Art Painting at the University of Brighton.

Feng received the William Coldstream Memorial Prize (2017) from the UCL Art Museum and the Excellence in Drawing Award (2015) from The Arts Club. She has exhibited internationally, including at Hart Haus, Hong Kong; Goethe Gallery, Hong Kong; Rabbet Gallery, London; The Salon by NADA & The Community with Current Plans, Paris; The Koppel Project, London; Daniel Benjamin Gallery, London; A.P.T Gallery, London; and the Freud Museum, London, among others. Her work is held in the UCL Art Museum Collection and various private collections worldwide.

《凝視異常》

2026年9月10日至10月4日

馮伊雯個展

《凝視異常》呈現馮伊雯「馴服的身體」三部曲最終篇章的全新繪畫作品。這個創作計劃始於疫情期間，在先後探討「屏障」與「手勢」之後，最終章轉向「觀看」，思考隨著螢幕、監控科技與人工智能介入日常生活，我們觀看及製造圖像的方式如何隨之改變。

在最新創作中，馮氏沒有直接描繪肉身，而是將早期畫作中的身體意象與圖表進行絲網印刷、壓縮，並嵌入畫面之中，使其在層層塗抹間以碎片或繪畫痕跡的形態重新浮現。透過畫面的框取、取材自自然形態的負空間，以及層層重疊的意象，馮氏嘗試營造一種感知上的拉扯：我們的雙眼究竟是被那些熟悉而誘人的自然形態表象所吸引，還是試圖挖掘掩埋於表面之下的隱蔽影像與殘存痕跡？這種「隱匿與顯現」的交錯，恰如以無害的圖像掩蓋真相的視覺策略。

畫面高度飽和的色彩令人聯想到數碼螢幕的人工光感，以及熱能影像的視覺語言。馮氏利用熱成像濾鏡拍攝日常周遭，再以這些影像作為繪畫素材。當日常景象經過如此強烈的色彩濾鏡轉化，熟悉的環境頓時帶上一種警戒、監視與偵查的意味。觀看也因而變得近乎鑑證式，誘發一種宛如尋找證據、勘查現場，或解讀斑駁痕跡以追尋過去真相的「偵查式觀看」。

這種高度警覺的觀看方式，也折射出人工智能介入圖像後對我們逐漸改變的觀看習慣的思考。當面對一張圖像時，我們的第一反應究竟是懷疑、主動搜尋，還是將判讀交付出去的認知退讓？

貫穿整個展覽，身體意象被壓縮成像素化圖像與資料碎片，映照出疫情以來身體被高度記錄、量化並轉譯為生物數據，持續推動相關科技的發展的現實。在畫廊空間內，觀者一方面會在金屬牆面看見自己的倒影，另一方面又置身於畫中反覆出現的「眼狀圖案」注視之下。這道凝視時而化作風暴之眼，時而成為裝置上的鏡頭，象徵機器無所不在的觀看及其所承載的權力。作品邀請觀者回望這道凝視，思考當身體持續透過螢幕與機器被觀看，我們如何逐漸被異化，又如何在不知不覺間習慣這種凝視。

展覽《凝視異常》並不試圖提供清晰流暢、易於解讀的圖像，而是呈現視覺與記憶中的斷裂。身體以陰影、碎片、筆觸，以及如系統故障般的痕跡持續存在，抵抗著被歸類、

劃分與定義。在這個日益由「機器視覺」塑造的時代，展覽追問：觀看本身，究竟承載著什麼？我們又能否透過觀看，重新奪回自我主體性？

關於藝術家

馮伊雯（生於廣東）現於香港與倫敦生活及創作。2014年獲倫敦皇家藝術學院藝術碩士學位，2020年於倫敦大學學院斯萊德美術學院完成以實踐為導向的博士學位，研究課題為 *Tracing the Unspeakable: Painting as Embodied Seeing*。現為倫敦藝術大學坎伯韋爾藝術學院兼任講師，曾任布萊頓大學繪畫專業高級講師。

馮氏曾獲倫敦大學學院藝術博物館 William Coldstream 紀念獎（2017）及 The Arts Club 繪畫卓越獎（2015）。作品曾於國際展出，包括香港 Hart Haus、歌德藝廊、倫敦 Rabbet Gallery、巴黎 The Salon by NADA & The Community with Current Plans、倫敦 The Koppel Project、Daniel Benjamin Gallery、A.P.T Gallery 及 Freud Museum 等。其作品納入倫敦大學學院藝術博物館及眾多私人收藏。
